TECHNICAL SKILLS

Software Development

Slack, Git

Databases

Mongo

Technologies & Frameworks

Node, React

Continuous Integration/Deployment

Heroku, Netlify.

Programming Languages

Javascript, HTML/CSS, React js

PROJECTS

BREAKING-BAD

- Breaking bad app shows breaking bad TV series characters attributes and their description eg name, nickname, birthday, status eg dead or alive.
- To get their attributes, one can search each character by his/ her real name .
- This app was built using React.js
- Here is the github url for breaking bad app [Breaking-bad](#)

BIRTHDAY-COUNTDOWN

- **Birthday Countdown** is an app that lets you countdown to birthdays in style! Never miss a birthday again and have a blast celebrating!
- This simple and clean **Birthday Countdown** counts down the months, days, hours, minutes and seconds to your birthday
- This app was built using React.js
- Here is the github url for the birthday countdown [Birthday countdown](#)

WEATHER-APP

- This weather app provides a local weather forecast in celsius and fahrenheit that shows how the weather will evolve in the next three days and how it evolved three days earlier.
- The app also shows the time, day and date the weather occurred.
- To build this app I used React js.
- Here is the github url for the weather app [weather](#)

FULL STACK TODO APP

- Todo App is an app that allows users to add, edit and delete tasks they want to work on, and also marks tasks as complete without deleting them.
- This app was built using React.js and node js
- Here is the github url for the full stack app [Fullstack](#)

CALCULATOR REACT

- The calculator app provides simple and advanced mathematical functions in a beautifully designed app. It performs basic calculations such as addition, subtraction, multiplication and division.
- This app was built using React.js
- Here is the github url for full stack app [calculator app](#)
